EDUCATION

University of California, Irvine

Bachelor of Science in Computer Science

- 4.0/4.0 GPA

Irvine, CA

June 2028

EXPERIENCE

Software Engineer Intern

Archwest Capital

Sept 2026 – Present

Irvine, CA

- **Ensured accurate daily leverage reporting (0.2-point variance caught)** by auditing a new live cash dashboard against the legacy Excel report and identifying a formula error in the manual process.
- **Enabled a third securitization** in the platform by reviewing **dynamic SQL replacing hardcoded logic**
- Closed **6 cross-department bug and UI tickets** in one week by implementing fixes in **Retool** and **SQL**

Software Engineer Intern

ITTIA

May 2026 – Aug 2026

Remote

- Improved **Cypress** E2E test reliability from **2/13 to 12/13** by debugging race conditions and attribute bugs
- Resolved a SQL error-handling UX gap by adding row/column-level error markers with descriptive feedback
- Redesigned dashboard home page in **Figma** to surface all core features without clutter, benchmarking against **2 competitor products** and producing **29 screen designs (58 components)**, refined through triweekly leadership reviews over **6 weeks** to a version **approved for production**

Full-Stack Developer

Commit the Change

Sept 2025 – May 2026

Irvine, CA

- Built a **centralized appointment management platform** with daily quota tracking and tiered permission portals for a call center serving **22,000+ patients**
- Developed full-stack features and **REST API endpoints** for real-time quota tracking, tiered permissions, and Google SSO using **React, Node.js, Express, and PostgreSQL**
- Implemented **data caching** with **TanStack Query**, reducing unnecessary backend data fetching by **30%**
- Collaborated with a cross-functional team of 12+ developers and 4 designers in an **agile** workflow

PROJECTS

Envoy

AI Agent Hackathon Product

TypeScript, Next.js, Anthropic Claude API, PostgreSQL MCP, Tailwind CSS, shadcn

Mar 2026

- Built a **multi-agent Anthropic Claude** pipeline (SQL generation, risk assessment, query explanation) that translates **natural language** into **SQL**, cutting response latency **6x (approx. 3 min → approx. 30 sec)**.
- Applied **responsible AI** principles by adding AI risk assessment and a **human-in-the-loop** preview of affected rows before execution to **prevent unsafe database modifications**.
- Integrated the **PostgreSQL Model Context Protocol (MCP)** server to give the agent **live schema awareness**, enabling context-accurate SQL generation without manual schema input.

Avision

Full-Stack Product

Apr 2026 – June 2026

React, TypeScript, CSS

- Built **11 REST API endpoints** for product search, filtering, and admin CRUD operations
- Migrated **2 of 7** legacy pages to TypeScript/React + Vite, building a reusable stats counter and badge component
- Built loading skeletons and debounced search across **3 data-table** pages, using Tailwind CSS and Headless UI

TECHNICAL SKILLS

AI/ML & Agentic Systems: Anthropic Claude API, Model Context Protocol (MCP), Multi-Agent Pipelines, Prompt Engineering, NLP, Neural Networks, PyTorch, scikit-learn, TensorFlow

Programming Languages: Python, Java, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, Node.js, Express, Flask, NumPy, Matplotlib, TanStack Query

Developer Tools & Practices: Git, GitHub, Visual Studio Code, PostgreSQL, PgAdmin, Cypress, Agile, unit testing
